

NAUTIKFLÖR IS A LIGHTWEIGHTED, WATER-RESISTANT PVC FLOOR COVERING SYSTEM WITH A NAUTICAL APPEARANCE AND A LOOK AND FEEL OF REAL WOOD

The high-quality planks are produced in Switzerland by the ICA Group and offer due to our sophisticated manufacturing procedure and standards an authentic nautical look; this cares for a precise "holly line" function and true wooden effects - an innovation which is only offered by NautikFlör.

Why accepting the high costs and enormous time efforts for laying a heavy wooden floor, when the desired look and charm of ones yacht, house or sales area can be realised in a much easier way with the NautikFlör system. Within hours you receive an authentic and luxurious nautical look & feel at a fraction of the price of a real wooden floor. But this is not all. NautikFlör is not only stylish and authentic - the covering is also practically free from maintenance!

The water-resistant planks are more durable than all other floor coverings, which are currently available on the market.

YOU DREAM OF A REAL WOODEN SHIP FLOOR BUT...

- cannot accept the expensive or long installation process?
- have not enough time and money for the accompanying maintenance efforts?
- worry about the additional weight of your boat?

DO YOU WORRY ABOUT THE ADDITIONAL WEIGHT ON YOUR BOAT?

THE PREMIUM FLOOR COVERING WITH A NAUTICAL LOOK

CHARACTERISTICS

NautikFlör uses the most modern technologies and HD printing to offer the ultimate nautical floor covering solution for boats, houses and large commercial areas.

- 1 Authentic nautical look
- 2 Quality design & production
- 3 Very resistant
- 4 Quick & easy installation

It looks so authentic that it can be used on boats and yachts of all sizes. It is so resistant that it is also used in large commercial spaces. It is so beautiful, that it can also be used in stylish private areas!

ADVANTAGES

The environmentally friendly, lightweight floor covering is 100% water-resistant and was developed to offer comprehensive protection against water damages, including moisture and wet.

- ✓ Low installation height of 5.5 mm
- ✓ Extreme stain resistance
- ✓ 100% water resistance
- ✓ Patented click connection
- ✓ No underlay required
- ✓ Environmentally friendly
- ✓ Affordable alternative to real teak wood
- ✓ Produced in Switzerland
- ✓ 20 years guarantee

With the click system the laying and installation is easy and time-saving. Depending on the area of use, NautikFlör is glued or installed as a floating floor. Due to its low weight of 5 kg/m² and the low installation height, NautikFlör is also ideal for smaller boats.
